

# Instructions to take LIVE VIDEO

Instructions were last updated Nov. 27<sup>th</sup> 2017 and are for Galaxy S7. Will be similar on iPhone, iPad, tablet etc.

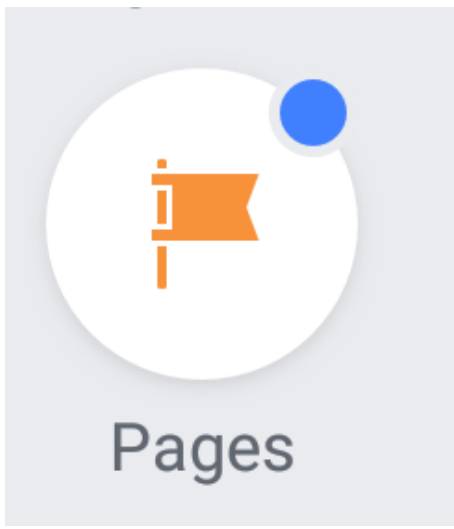

**1)** Download & open Facebook App on your tablet, iPad, or smartphone

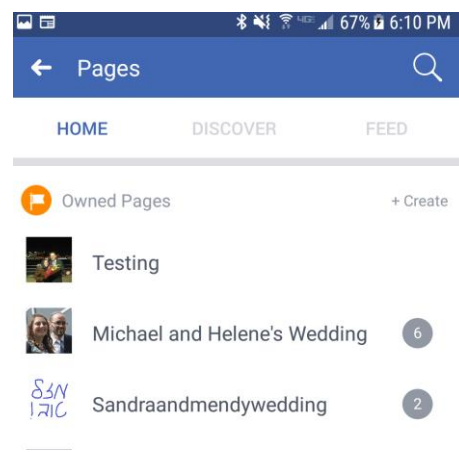

**2)** Log in to your account and click settings button on bottom right

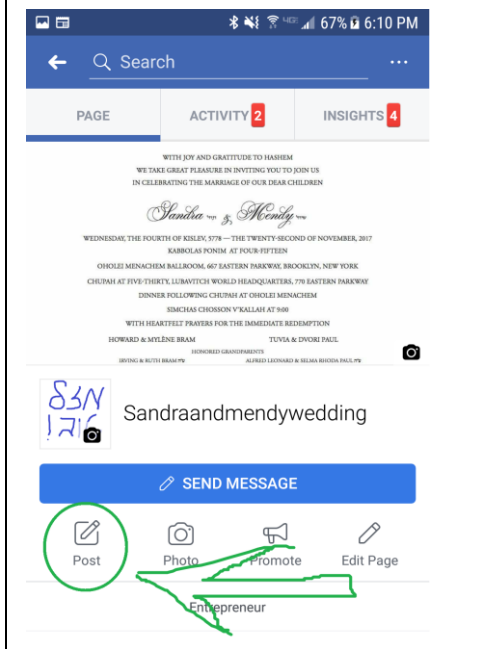

**3)** Click pages

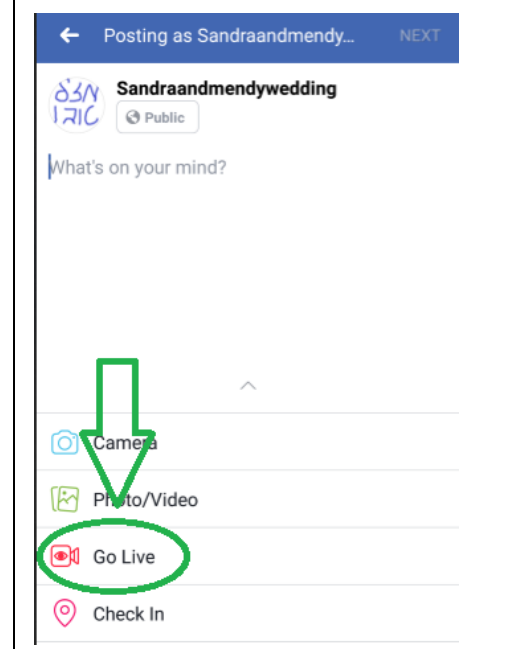

**4)** Choose the correct page. (If you can't find page then type in page name and search for it)

5) Click on Post

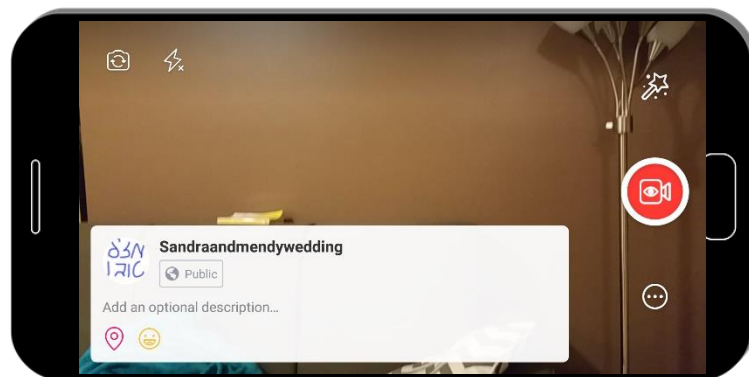

6) Click Go Live

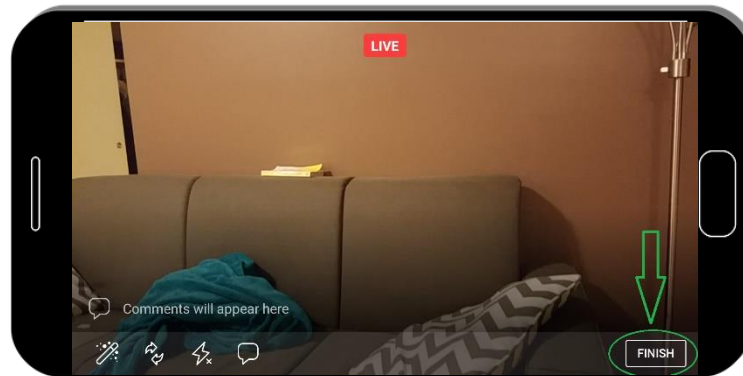

7) You can type in a description if you want, such as “wedding ceremony”, “main dance” etc.

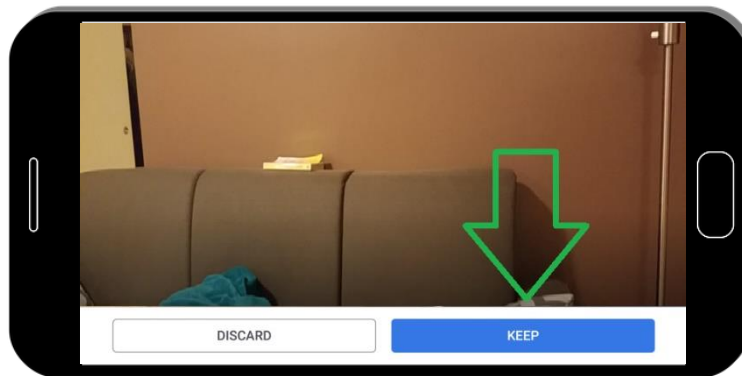

- Flip your phone to horizontal orientation. *Horizontal video is full screen and so looks better.*
- If screen looks right, then press red camera button to start LIVE video broadcast.
  - *If you instead see a blank black screen, then you need to reset video. Simply flip phone to vertical for a second, and then flip back to horizontal. That will reset video and allow you to see proper screen.*
- **Warning:** After starting video, do NOT flip phone orientation (i.e. from horizontal to vertical). *Flipping phone may cause video to be saved with wrong orientation.*

8) Press FINISH to finish taking video.

9) After taking video, press KEEP so your video will stay online. This is very important!!!!

# YOU FINISHED!!!

If you followed above instructions, then  
your video has been Livestreamed and  
saved online
