

Instructions to set up Facebook Page Website

- 1) Go to www.facebook.com. Click *Pages*. Click *Create Page*. Click *Brand or Product*. For your category choose *Website*. Choose *any name*, such as 'Michelleandmoshewedding.' Upload a Profile Picture, or choose *skip* and do that later. Upload a Cover Photo, or choose *skip* and do that later. Press the *Page* button on top so website link will be reset to shortest value. You Did It!!! You're Finished. Now Copy the Link to send to friends.
- 2) Whoever made the page, i.e. you, is automatically the page's administrator. That means you can find the Page easily. If your camera person will be live streaming using a different Facebook account, then make them an Editor of your page. Having Editor status will make it easier for them to find your page within the Facebook App. To make them an Editor, click on *Settings*, then click *Page Roles*, then assign them as an Editor.
 - *Note: you will need a Facebook account. If you don't have one, then you can create one on Facebook for free.*
 - *Your final Page will look like this sample Facebook Page:*
<https://www.facebook.com/Michelleandmoshewedding-190270061537902/>
 - *Note: For those who will be livestreaming events such as weddings, make sure to tell people or post the below INSTRUCTIONS:*

INSTRUCTIONS:

To see live video, you will have refresh your page AFTER the live-stream begins.

Also, if you don't have a Facebook account, Facebook will ask you if you want to create one. Click "not now" and you will not have to create one.
