

How to Livestream to Your Facebook Page

Last updated Oct. 3rd 2018. Screenshots were taken on Android Galaxy S7. Will be similar on iPhone, iPad, tablet etc.

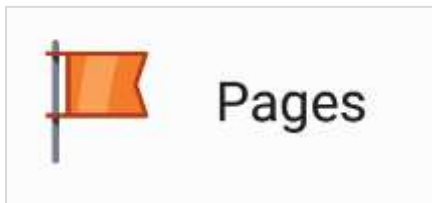

1) Open App: Download & open Facebook App on your tablet, iPad, or smartphone

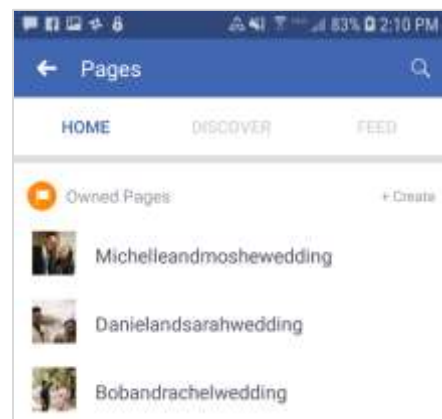

2) Open Settings: Log in and click  button on top right

3) Click Pages: Scroll down and click *Pages*

4) Click Correct Page: If you can't find page then type in page name and search for it

Stream2Site

Donations can be made at: www.paypal.me/moshesiegel/15

5) Start New Post: Start a New Post by clicking *write something...*

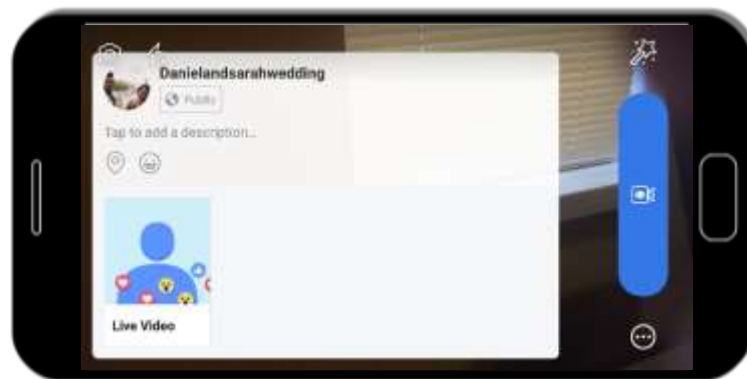

6) Click Go Live

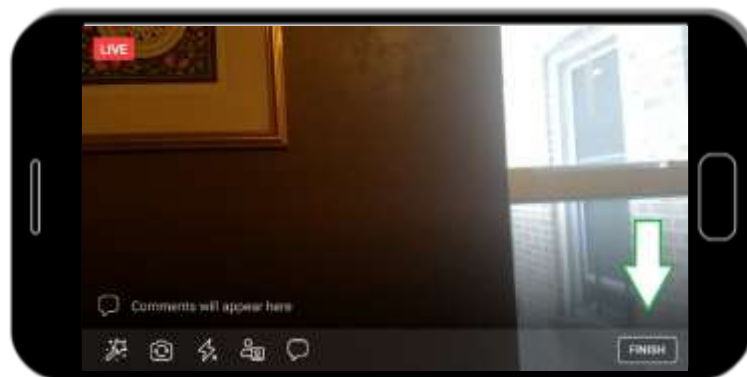

7) Start Live Video: When ready, press button to *Start Live Video*

- You can add an optional video description.
- We recommend flipping your phone to horizontal orientation as horizontal video looks better than vertical on desktops.
- **Note:** Flipping orientation (i.e. from vertical to horizontal) may only be done BEFORE video starts. Once video starts phone orientation can no longer be flipped.

8) To end live video press FINISH

Donations can be made at: www.paypal.me/moshesiegel/15

9) Share to Your Page: Press SHARE to keep the video and post it to your Facebook Page. Otherwise, press Delete to delete the video.

YOU FINISHED!!!

If you followed the above instructions, then
your video has been livestreamed and
posted to your Facebook Page
